Now in its fourth edition, Martin and Schinzinger's Ethics in Engineering provides an introduction to the key issues in engineering ethics, taking account of both specific organizational contexts and broader technological trends. Current and thorough, it promotes critical thinking and discussion about moral and ethical issues that engineers face. The up-to-date content provides real world examples and cases and, by offering a framework for understanding ethical dilemmas within engineering, prepares readers for issues they will confront in their careers.

Having enjoyed two highly successful previous editions, this text has been revised to coincide with the new directive by ABET (the Accrediting Board for Engineering and Technology) to expand the Ethics for Engineers course. The third edition can be used by freshmen studying the Introduction to Engineering course, or at the senior level, within the capstone design course.

Moral problems that engineers may face in their professional lives are discussed, with particular reference to corporate settings. The authors place these issues within a philosophical framework & seek to exhibit the social importance & intellectual challenge of each one.

As commonly understood, professional ethics consists of shared duties and episodic dilemmas—the responsibilities incumbent on all members of specific professions joined together with the dilemmas that arise when these responsibilities conflict. Martin challenges this "consensus paradigm" as he rethinks professional ethics to include personal commitments and ideals, of which many are not mandatory. Using specific examples from a wide range of professions, including medicine, law, high school teaching, journalism, engineering, and ministry, he explores how personal commitments motivate, guide, and give meaning to work.

As the impact of data science continues to grow on society there is an increased need to discuss how data is appropriately used and how to address misuse. Yet, ethical principles for working with data have been available for decades. The real issue today is how to put those principles into action. With this report, authors Mike Loukides, Hilary Mason, and DJ Patil examine practical ways for making ethical data standards part of your work every day. To help you consider all of possible ramifications of your work on data projects, this report includes: A sample checklist that you can adapt for your own procedures Five framing guidelines (the Five C's) for building data products: consent, clarity, consistency, control, and consequences Suggestions for building ethics into your data-driven culture Now is the time to invest in a deliberate practice of data ethics, for better products, better teams, and better outcomes. Get a copy of this report and learn what it takes to do good data science today.

EVERYDAY MORALITY brings ethics to bear on a wide array of everyday practical concerns. Written in a clear and engaging way and rich in practical illustrations and applications, the book takes up both standard topics such as abortion and euthanasia, but also a wide array of often neglected topics such as self-respect, self-deception, addictions, money, and community service.

EVERDAY MORALITY, above all, will help you students gain a critical outlook with respect to the effects of moral character that permeate everyday life: virtues and vices, commitments and attitudes, personal relationships and community involvement, right and wrong conduct.

In the primary arc, a rich young woman is abused, humiliated and abandoned by her new husband, Jacob Fuller, whom she married against the wishes of her father. The young Fuller resents her father's rejection and dismissal of him as a ne'er-do-well and resolves to exact his revenge by mistreating his new bride.

Through engaging personal stories, Bridging Barriers tells of the trials, tribulations and successes of the engineers and community members who gave new hope to La Garrucha in the Guatemalan Highlands by building a water project and constructing a bridge to defeat The Assassin, a raging river in the area.
