This book is a comprehensive climatic monograph, which addresses one of the most complex mountain environments in Europe, the Carpathians Chain, focusing on the branches that lie over Romania. The volume aggregates high quality input data, state-of-the-art techniques, regional analysis and overview perspectives, while addressing the spatial and temporal patterns of the main climatic elements. The study covers the period 1961-2010, for the present climate, while the perspective is extended up to 2050. The main climatic elements (e.g. air temperature, precipitation, wind) are analyzed, but some specific variables like snow depth and snow cover are also examined, both in terms of average behaviour and extreme characteristics. This is the first synthesis addressing the climate of this mountain region, and it provides useful information for scientists, mountain stakeholders, decision-makers and general public.

This clear and engaging text examines the process and politics of the UnionOs OEasternO enlargement,

beginning with its initial response to the 1989 revolution up through the Helsinki summit decisions of December 1999.

Developments in the European Union brings together specially-commissioned chapters by leading authorities, rigorously edited into an accessible student text to provide an up-to-date introduction to the EU after ratification of the Amsterdam Treaty. The book ranges broadly over policy areas and provides extensive coverage of the economic, social and legal dimensions of the EU and its changing composition and place in the world.

It is only a decade ago that the eighteenth-century distinction between civil society and the state seemed old-fashioned, an object of cynicism, even of outright hostility. In this important new book, John Keane shows how, in a wholly unexpected reversal of fortunes, this antiquated distinction has since become vogueish among politicians, academics, journalists, business leaders, relief agencies and citizens' organizations. John Keane examines the various sources and phases of the dramatic world-wide popularization of the term. He traces its reappearance in a wide range of contexts - from China to Tunisia, from South Africa to the emerging European Union - and clarifies the conflicting grammars and vocabularies of the language of civil society. Considerable care is taken to highlight the different possible meanings of the distinction between civil society and the state. Keane also takes the reader into previously uncharted intellectual territory by demonstrating that the civil society perspective contains unharnessed potentials: that it is possible to develop bold new images of civil society that alter the ways in which we think about matters such as power, property, violence, politics, publicity and democracy. Written with style and imagination, this important book by John Keane will be of great interest to students and scholars in politics, media studies, sociology, social and political theory, and to a broader public audience interested in the central debates and political developments of our time.

A collection of essays by commentators on Europe, addressing a range of issues in the debate, from the "enlargement" of the EU, or the Maastricht convergence criteria, to controversies over "federalism" and democratic accountability, or the international competitiveness of the European "bloc"

This work looks at how research diagnoses of urban problems in the US have influenced (and been

influenced by) policy responses to those problems. Issues include economic development, education, poverty, family support, housing, intergovernmental financial relations and racial discrimination.

While people profess a disdain for politics, in a democracy politics is the primary vehicle for citizens to influence the decisions and decision makers that shape public policy at every level. This widely acclaimed work provides an overview of public policymaking in all its aspects along with basic information, tools, and examples that will equip citizens to participate more effectively in the policymaking process. It is intended for use in internships and service-learning programs, but will serve equally as a resource for any organized effort to involve citizens in community service and the exercise of civic responsibility. This updated edition includes an all-new case study on the issue of immigration, and all other case studies have been revised.

Economic reasoning has thus far dominated the field of public policy analysis. This new introduction to the field posits that policy analysis should have both a broader interdisciplinary base—including criteria from such fields as political science, sociology, law, and philosophy, as well as economics—and also a broader audience in order to foster democratic debate. To achieve these goals, MacRae and Whittington have organized their textbook around the construction of decision matrices using multiple criteria, exploring the uses of the decision matrix formulation more fully than other texts. They describe how to set up the matrix, fill in cells and combine criteria, and use it as an aid for decision making. They show how ethical assessment of the affects that alternatives have on various parties differs from political analysis, and then they extend the use of the decision matrix to consider alternatives by affected parties, periods of time, or combined factors. The authors also thoughtfully address the role of expert advice in the policy process, widening the scope of the field to describe a complex system for the creation and use of knowledge in a democracy. An extended case study of HIV/AIDS policy follows each chapter (in installments), immediately illustrating the application of the material. The book also contains a glossary. *Expert Advice for Policy Choice* provides a new basis for graduate education in public policy analysis and can also serve as a text in planning, evaluation research, or public administration. In addition, it will be of interest to students and professionals wishing to aid policy choice who work in such fields as sociology, political science, psychology, public health, and social work.
