Light when it fails a self diagnostic cycle.

When on, it indicates that the Expedition does not have Anti-Lock brakes, and the safety they provide.

Your Expedition 's ABS system uses a system of sensors to determine wheel speed when braking.

the Advancetrac.

They are totally separate systems that don't even use the same modules. Could just be that during the change they bumped something like a wheel speed sensor that "fixed" it, or could be that one or more of your winter tires are differently sized (more worn) than the others.
