The first major history of the bravura movement in European painting The painterly style known as bravura emerged in sixteenth-century Venice and spread throughout Europe during the seventeenth century. While earlier artistic movements presented a polished image of the artist by downplaying the creative process, bravura celebrated a painter's distinct materials, virtuosic execution, and theatrical showmanship. This resulted in the further development of innovative techniques and a popular understanding of the artist as a weapon-wielding acrobat, impetuous wunderkind, and daring rebel. In Bravura, Nicola Suthor offers the first in-depth consideration of bravura as an artistic and cultural phenomenon. Through history, etymology, and in-depth analysis of works by such important painters as François Boucher, Caravaggio, Francisco Goya, Frans Hals, Peter Paul Rubens, Tintoretto, and Diego Velázquez, Suthor explores the key elements defining bravura's richness and power. Suthor delves into how

bravura's unique and groundbreaking methods—visible brushstrokes, sharp chiaroscuro, severe foreshortening of the body, and other forms of visual emphasis—cause viewers to feel intensely the artist's touch. Examining bravura's etymological history, she traces the term's associations with courage, boldness, spontaneity, imperiousness, and arrogance, as well as its links to fencing, swordsmanship, henchmen, mercenaries, and street thugs. Suthor discusses the personality cult of the transgressive, self-taught, antisocial genius, and the ways in which bravura artists, through their stunning displays of skill, sought applause and admiration. Filled with captivating images by painters testing the traditional boundaries of aesthetic excellence, Bravura raises important questions about artistic performance and what it means to create art.

"A study based on the text, the Lives of the Artists, by Giorgio Vasari. Discusses how the visual arts in the Renaissance were an occasion for delight or pleasure. Argues that such an attention was encouraged by certain social and intellectual practices"--Provided by publisher.

Dante and Heterodoxy: The Temptations of 13th Century Radical Thought, edited and with an introduction by Maria Luisa Ardizzone, collects several studies devoted to discussing Dante's work in the light of the intellectual debate that developed in thirteenth century Europe after the entrance of new Aristotelian learning and the diffusion of Greek-Arabic thought, in particular

the Latin translations of works by Ibn Rushd (Averroes). What takes form in the various articles is the emerging of an interest in the philosophical and scientific contents of Dante's opus. Heterodoxy in this volume is thus linked to, but not always coincident with, what medieval scholars such as Ferdinand Van Steenberghen or Alain De Libera term "radical Aristotelianism" or "Integral Aristotelianism". The word "temptations", as its meaning clearly shows, delineates not an organic link with heterodox or radical ideas, but rather an intermittent inclination to include or evaluate themes related to these ideas. "Temptations" implies a search, an interrogation that consists of the doubts and uncertainties of a poet strongly involved in the intellectual debate of his time and culture, and for whom philosophy and theology are not fields of opposition but different modes of inquiry.
