Continuing Tom L. McKnight's well-known thematic focus on landscape appreciation, Darrel Hess offers a broad survey of all of the physical processes and spatial patterns that create Earth's physical landscape. McKnight's Physical Geography: A Landscape Appreciation provides a clear writing style, superior art program, and abundant pedagogy to appeal to a wide variety of students. This new edition offers a truly meaningful integration of visualization, technology, the latest applied science, and new pedagogy, providing essential tools and opportunities to teach and engage students in these processes and patterns.

PLEASE PROVIDE COURSE INFORMATIONIdeal for use with any text on Physical Geography, this laboratory manual contains step-by-step exercises that help students apply essential geographic principles, methods, and tools to better understand Earth and its systems. Organization of each lab exercise chapter entails an introduction, key terms and concepts listing, objectives of the chapter, and a listing of materials and sources needed to complete the exercises. The initial laboratory exercise is called the Prologue Lab and is unique to this manual. The assignments in the Prologue are meant to span the entire term and will provide students with the tools of spatial analysis that are at the core of geography.

A variety of exercises provide flexibility in lab assignments. Each exercise includes key terms and learning concepts linked to Geosystems. The 10th Edition includes more integrated media, including Quick Response (QR) codes linking to Pre-Lab videos. Supported media resources needed for exercises including KMZ files for all of the Google Earth(tm) exercises found in the lab manual.

Offering current examples and modern science within a one-of-a-kind Earth systems organization, 'Geosystems' provides a truly unique physical geography experience.

For courses in Physical Geography. Explore the changing global environment with real-world examples and mobile field trips Continuing Tom L. McKnight's well-known thematic focus on landscape appreciation, Darrel Hess offers a broad survey of all of the physical processes and spatial patterns that create Earth's physical landscape. McKnight's Physical Geography: A Landscape Appreciation provides a clear writing style, superior art program, and abundant pedagogy to appeal to a wide variety of readers. The Twelfth Edition offers a truly meaningful integration of visualization, technology, and the latest applied science, providing essential opportunities to teach and engage readers in these processes and patterns. Topics that are tied to readers' real-world concerns such as global environmental change, along with new videos, photography, online lab resources, and updated interactive tools, make it the most effective learning program for physical geography. Also available with MasteringGeography™ This title is also available with MasteringGeography-an online homework, tutorial, and assessment program designed to work with this text to engage students and improve results. Interactive, self-paced tutorials provide individualized coaching to help students stay on track. With a wide range of activities available, students can actively learn, understand, and retain even the most difficult concepts. Note: You are purchasing a standalone product; MasteringGeography does not come packaged with this content.
