South African criminal law is the body of national law relating to crime in South Africa. In the definition of Van der Walt et al., a crime is "conduct which common or statute law prohibits and expressly or impliedly subjects to punishment remissible by the state alone and which the offender cannot avoid by his own act once he has been convicted." Crime involves the infliction of harm against ...

South African criminal law - Wikipedia

Writing legal essays and answering problem questions for modular subjects and exams - a Guide. Esther McGuinness, School of Law, Magee Campus 1. General citation of authorities One of the most important requirements for answering questions on the law is that you must be able to back the points you make with authority, usually

Men have always dominated the most basic precepts of the criminal legal world - its norms, its priorities and its character. Men have been the regulators and the regulated: the main subjects and objects of criminal law and by far the more dangerous sex. And yet men, as men, are still hardly talked about as the determining force within criminal law or in its exegesis. This book brings men into sharp focus, as the pervasively powerful interest group, whose wants and preoccupations have shaped the discipline. This constitutes the 'man problem' of criminal law. This new analysis probes the unacknowledged thinking of generations of influential legal men, which includes the psychological and legal techniques that have obscured the operation of bias, even to the legal experts themselves. It explains how men's interests have influenced the most cherished legal norms, especially the rules of human contact, which were designed to protect men from other men, while specifically securing lawful sexual access to at least one woman. The aim is to test the discipline's broadest commitments to civility, and its trajectory towards the final resolution, when men and women were declared to be equal and equivalent legal persons. In the process it exposes the morally and intellectually limiting consequences of male power.

Derived from the renowned multi-volume International Encyclopaedia of Laws, this book provides a practical analysis of criminal law in South Africa. An introduction presents the necessary background information about the framework and sources of the criminal justice system, and then proceeds to a detailed examination of the grounds for criminal liability, the justification of criminal offences, the defences that diminish or excuse criminal liability, the classification of criminal offences, and the sanctions system. Coverage of criminal procedure focuses on the organization of investigations, pre-trial proceedings, trial stage, and legal remedies. A final part describes the execution of sentences and orders, the prison system, and the extinction of custodial sanctions or sentences. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable resource for criminal lawyers, prosecutors, law enforcement officers, and criminal court judges handling cases connected with South Africa. Academics and researchers, as well as the various international organizations in the field, will welcome this very useful guide, and will appreciate its value in the study of comparative criminal law.

This book aims to investigate whether, and if so, how, an institution designed to bring to justice perpetrators of the most heinous crimes can be regarded a tool of oppression in a (neo-)colonial sense. To do so, it re-invents the concept of neo-colonialism, which is traditionally associated more with

economic or political implications, from an international criminal law perspective, combining historical, political and legal analyses. Allegations of neo-colonialism in relation to the International Criminal Court (ICC) became widespread after the Court had issued an arrest warrant against the Sudanese President Omar Al-Bashir in 2009. While the Court, since its entry into function in 2002, has been confronted with criticism from various corners, the neo-colonialism controversy was sparked by African stakeholders. Unlike other contributions in this domain, thus, this book provides a Western perspective on an issue more often addressed from an African standpoint, with the intention of distinguishing itself from the more political and emotive and sometimes superficial arguments that exist within critical legal approaches towards the ICC. The subject matter will primarily be of interest to scholars of international criminal law or those operating at the intersection of law and politics/history, nationals of African states and from other parts of the world professionally interested and/or involved in international criminal law and justice and the ICC, and governmental and non-governmental organizations. Secondly, the book will also appeal and speak to critical legal scholars and those interested in historical legal analysis. Res Schuerch is a Swiss lawyer specialized in the field of International Criminal Law and the ICC. He previously worked as a researcher at the University of Amsterdam and as an academic assistant at the University of Zürich.

With populist, nationalist and repressive governments on the rise around the world, questioning the impact of politics on the nature and role of law and the state is a pressing concern. If we are to understand the effects of extreme ideologies on the state's legal dimensions and powers - especially the power to punish and to determine the boundaries of permissible conduct through criminal law - it is essential to consider the lessons of history. This timely collection explores how political ideas and beliefs influenced the nature, content and application of criminal law and justice under Fascism, National Socialism, and other authoritarian regimes in the twentieth century. Bringing together expert legal historians from four continents, the collection's 16 chapters examine aspects of criminal law and related jurisprudential and criminological questions in the context of Fascist Italy, Nazi Germany, Nazi-occupied Norway, apartheid South Africa, Francoist Spain, and the authoritarian regimes of Brazil, Romania and Japan. Based on original archival, doctrinal and theoretical research, the collection offers new critical perspectives on issues of systemic identity, self-perception and the foundational role of criminal law; processes of state repression and the activities of criminal courts and lawyers; and ideological aspects of, and tensions in, substantive criminal law.

South Africa, the power house of the African continent, as well as Germany, Europe's largest economic power, are faced with an intricate maze of international obligations, whether related to the United Nations, the World Trade Organization, the African Union or the European Union (EU), international human rights law, international humanitarian law, or any other sub-regime of international law. The two countries are in a different position when facing the implementation of this maze of obligations. South Africa is a developing economy that faces various capacity challenges which, at times, also impact the manner and extent to which it implements its international treaty obligations. Germany, on the other hand, benefits from comparatively well-funded institutes of international law and a well-trained academic community, which have contributed to the successful implementation of much of international law. But as the relevant chapters in this volume show, the German case is not without its own complexities. As a result, an exchange of ideas and experiences pertaining to the implementation of international obligations can prove fruitful for both countries. Moreover, such an exchange could also serve as a useful point of departure for other countries in Southern Africa that face similar challenges in relation to implementation. The current book explores suitable techniques of implementation of international law, by comparing South Africa with Germany. After a general overview of the status of international law within Germany and South Africa respectively, it focuses on the implementation of international instruments pertaining to key sub-areas of international law in the two countries. These include the United Nations Charter (peace and security), the international law of the sea, international economic law, international environmental law, international human rights law, international criminal law, regional integration, and the status of international judicial decisions before domestic courts.

Principles of International Criminal Law is one of the most influential textbooks in the field of international criminal justice. This fourth edition builds on the highly-successful work of the previous editions, setting out the general principles governing international crimes as well as the fundamentals of both substantive and procedural international criminal law. It provides a detailed understanding of the sources and evolution of international criminal law, demonstrating how it has developed, and how its application has changed. The book assesses in detail the four key international crimes as defined by the statute of the International Criminal Court: genocide, crimes against humanity, war crimes, and the crime of aggression. The new edition revises and updates the work with developments in international criminal justice since 2014. It includes substantial new material on critical perspectives on

international criminal justice, the fragmentation of international criminal law, new war crimes of prohibited means of warfare, and the prosecution of crimes committed in Syria and Northern Iraq. The book retains its highly-acclaimed systematic approach and consistent methodology, making it essential reading for both students and scholars of international criminal law, as well as practitioners and judges working in the field.
